

Graveyard Ghost Puzzles

The first step to beating the level is passing Gary the ghost and touching the church doors. Gary is faster than you, and always running straight at you, so you can't just run to the door.

LEVEL 1

The first solution is to stare at Gary the whole time and walk backwards to the door. This is very slow so it not not the optimal solution.

Next is to trap Gary with the statue. Gary can't tell the difference between a statue and a person, so if you walk past the statue while he's chasing you, he'll see the statue staring at him and stop following you. Then you can turn straight towards the door and walk there faster. Since backpedaling is much slower than walking, this will give you a faster time.

LEVEL 2

Level 2 is the same as the first level except the door is locked. The key to the door will be randomly spawned behind one of the 50 graves. The optimal way to solve this puzzle is to trap Gary with the statue and then go looking for the key. If you take too long and keep looking back at Gary, he'll escape, so be fast.
